Economic Evaluation of Healthcare Technology: using cost-effectiveness analysis

This course consists of lectures by Professor Mark Sculpher from Center for Health Economics at the University of York in the UK, one of the leading institutes of research and education of health economics. The lectures address theory and practice of cost-effectiveness analysis of healthcare technologies.

The course is designed for post-graduate students and professionals in the health sector, and is aimed for participants to learn cost-effectiveness analysis in a practical manner by using a spreadsheet software. Japanese researchers will support the participants by answering individual questions.

| | | |
|----------------|-------------|---|
| Program | 9:45-9:50 | Opening remarks |
| | 9:50-10:00 | Overview of the course |
| | 10:00-11:00 | Lesson1 Methods of cost-effectiveness analysis (CEA) (30 min lecture and 30 min practice) What is cost-effectiveness analysis? What measure of benefits? Selecting options to compare Decision rules Thresholds – conceptual and empirical Issues and debates |
| | 11:00-12:00 | Lesson2 Different vehicles for CEA (30 min lecture and 30 min practice) Trials and models in cost-effectiveness analysis Examples of trial-based studies Problems with trial-based studies Key elements of decision modelling |
| | 12:00-13:00 | Lunch |
| | 13:00-15:00 | Lesson3 Introduction to decision modeling (30 min lecture and 30 min practice) Why modelling? Decision trees Basic Markov modelling Uncertainty analysis |

- **Things to bring** 1) Laptop PC with a spreadsheet software (MS Excel, Google Spreadsheet, etc.)
2) a calculator (A smartphone with calculator function will do.)

■ **Course material** Course material will be prepared by the organiser

■ **Organiser** Research Center for Health Policy and Economics, Hitotsubashi Institute for Advanced Study

■ **Co-sponsor** The Kikawada Foundation (The 21-Seiki Bunka Gakujuutsu Zaidan)
